

## Download the Google Talk Client for CQUniversity Students

Students can download the **Google Talk stand-alone client** to be able to chat with other friends from their desktop outside of the CQUniversity Mail window. This also enables students to chat with anyone outside of CQUniversity who uses *Google chat* or *AOL Instant Messenger (AIM)*.

1. Visit <http://www.google.com/talk/> and click "**Download Google Talk**".
2. When prompted, click "**Run**" and accept the Terms and Conditions.
3. Once installed, the Google Talk client will open and you will need to sign in with your "@cqumail" email address and password.

Email alerts pop up in the lower-right corner of your desktop whenever you receive a new message – even if CQUni Mail isn't open.

4. To sign out of Google Talk click on the arrow beside your status and select "**Sign out**".
